

How –To Collect and Submit a Fecal Sample

- Record when your horse was last dewormed and which product was used. Use the chart below to find the best time to collect manure from your horse.

Product Used	Wait Time Before Collecting Manure Sample
Fenbendazole (Panacur)	Wait 9-10 weeks after the last deworming.
Pyrantel (Strongid)	Wait 9-10 weeks after the last deworming.
Ivermectin	Wait 10-12 weeks after the last deworming.
Moxidectin (Quest)	Wait 14-16 weeks after the last deworming.

- Collect one fecal ball from your horse's stall. The sample should be less than 6-12 hours old, in the winter make sure it is not frozen.
- Place the sample in a sealed container (Ziploc baggie, Tupperware, etc...). We have sample containers available at the clinic at no charge.
- Keep the sample in the refrigerator if it will be more than a few hours before you deliver it to HVA. Do not freeze the sample.
- Fill out fecal SUBMISSION form
- Drop the sample and submission form off at our clinic during business hours (Mon-Fri, 9 am-5 pm).
- We will contact you with the results and our recommendations within 5-7 business days.
